

2003-47

Dear Sirs:

I am a seventy year old retired steelworker. I have asbestosis of the lungs from working thirty years in the steel mills. I believe that companies should be responsible for their actions. I should have the right to the court system and trial by a jury. That is why I am opposed to the (Proposed Court Rule No. 2003-47). I did not ask for this disease, but I've got it. Don't take away my rights and access to our courts and juries.

Thank you for your attention.

Retired Steel Worker
William E. Wright
